

CSS PUBLIC WORKSHOP NO. 3
And
NEPA PUBLIC INFORMATIONAL MEETING

for

NEW CANADA ROAD

FROM STATE ROUTE 1 (U.S. HIGHWAY 70)
TO INTERSTATE 40

SEPTEMBER 29, 2009
6:00 p.m. to 8:00 p.m.

at

I.H. MANAGERIAL PARK
4523 CANADA ROAD, LAKELAND, TN

This is the third in a series of Public Workshops focused on improvements along Canada Road. Working toward a consensus, the Canada Road Advisory Team (The Team) has developed recommendations for the roadway which will be presented at this Workshop.

The Team has worked together since December 2008 to study and prepare a recommendation for improving Canada Road. During the 9-month period, the team gathered six (6) times for meetings and conducted two (2) Public Workshops to seek public input. The results of that input were reviewed and discussed by the Team, and was used to guide them in their decision-making.

With the selection of a preferred alignment by The Team, a series of environmental studies will soon begin to determine the environmental impacts of the alignment in accordance with the National Environmental Policy Act (NEPA). The NEPA process will be outlined during the meeting, and questions and comments will be accepted for consideration during the NEPA process.
